

**FORMULA SAE ITALY - 2020 Contest**  
**Design for Future: Dream your 2025 FSAE Italy Car**  
**PARTNERS Awards**

**CSI** will offer to the **3 winners** a webinar on Passive Safety and a technical virtual visit of CSI

**Dallara** will offer to **1<sup>st</sup> classified team** the Dallara Stradale scale model signed by Eng. Giampaolo Dallara.

**Danisi Engineering** is happy to offer to the **winners** of the Formula SAE Italy - 2020 Contest Design for Future: Dream your 2025 FSAE Italy Car the opportunity of a dedicated driving session on its [dynamic driving simulator](#) in spring 2021

Each Team, composed by no more than **3 members** (i.e. driver + 2 technicians) will have the chance to drive his FSAE vehicle on our dynamic simulator.

In order to make no differences, all the Teams will be requested to provide us the passive vehicle models. This will allow the Teams to test the basic vehicle dynamics attitude of their projects.

Considering the current restrictions due to the sanitary emergency, we propose to organize three different sessions (one for each Team), lasting four hours each (half of a day).

I truly hope our proposal will create a great challenging mood in the Team participating the event, as in the FSAE spirit.

**Granstudio** will offer to the **3 winners** a visit on the track of Lombardore and few laps on their Dallara Stradale together with a professional driver, in conjunction with a specific company event (presumably summer 2021).

**PMFactory** can offer up to **three internships**, from remote due to the contingency. Internships can be offered in the following areas: design and engineering. Actual topics will be defined according to student's profiles and interests.
