

Dear Formula Student Team,

We hope you will be part of Business Presentation Stage 3.

And in preparation of the Stage 3, we have for you an additional item we would like you to develop and share.

In the last few years, some unexpected events, such as the COVID pandemic and the war close to European borders, have caused Semiconductor and Raw Material shortfall, but also a huge increase of the inflation (especially Labor and Energy). Therefore, the economical situation is more and more unstable and unpredictable

We wish to see how you did take into consideration the current unstable economical situation by presenting the risk assessment you have made and the related counter measures

Please include this topic in your Stage 3 Business Plan Presentation to be held on July 13th and 14th 2023

Yours sincerely

Valentina Temporelli & Enrico Rebaudo
